FLIP 2 Workshop

MSK CASE CONFERENCE SERIES

A team convened by the Center representing PT, OT, PA, NP, and MD programs and representing a range of disciplines, including Rheumatology, Orthopedic Surgery, Sports Medicine, and Primary Care is offering a series of virtual case conferences for students this year. Topics have included “The Clinical Exam & Diagnostic Reasoning” and “Imaging: What to Order When?”. Sessions involve small group case discussions and expert panel topic reviews.

The team offered a session on June 7 on threatened limb loss with an all-star IP panel including a patient and reps from nursing, surgery, hospital medicine, PT, and podiatry. A follow up in-person session will occur on June 21 6-7:30P in the IPE building and feature innovative approaches to collaborative care of people with limb loss.

Dissemination, Distinctions, and Scholarship

Congratulations to Nick Hudak, Mpa, Msed, PA-C! Nick has recently been named the Assistant Editor for the Journal of PA Education. Help us celebrate Nick!

Educational Programming

The Center held Foundations of Learning in Interprofessional Practice (FLIP!) Workshops for the spring to provide health professions students with interactive, case-based experience in interprofessional communication. Over 400 students from DPT, OTD, PA, ABSN, and MD programs learned about a variety of strategies for collaborating across professions to provide high quality patient care.

k

Be on the lookout for a future announcement regarding our upcoming FLIP 1 workshop in the fall of 2022!

IPEC Center hosts Education Grand Rounds

On May 18, the IPEC Center hosted Healthcare Education Grand Rounds. Dr. Christopher Lunsford and Dr. Marion Quirici presented on Disability Conscious Medicine. Both speakers presented the scope of issues with able-ism in society, healthcare, and health professions education. Practical advice was offered on raising awareness and ability to advocate and clinicians, teachers, and community members. Many thanks to Drs. Lunsford and Quirici.

Student Engagement

The IPEC Center selected 18 students from MD, DPT, OTD, PA, ABSN, MSN, DNP, and PhD programs to participate in the IPEC Student Advisory Committee (SAC). The committee provides guidance and inspiration for the work of IPEC Center. SAC members work in 4 focus areas: service learning, social events, clinical experiences, and didactic/courses (aka “classroom”). This engaged group of students have been instrumental in generating ideas each workgroup has developed proposals for future student activities and involvement. The group has also provided feedback on IPEC Center initiatives, including the new FLIP! Curriculum.

The photograph above is a group of students attending an interprofessional happy hour hosted by the SAC at Bull McCabe's. These events occur monthly, on Tuesdays, during the spring. Join the SAC for their next event on June 14, 2022, from 06:00- 08:00 pm, at Boxcar Barcade.
