

CENTER FOR NURSING RESEARCH

Research Development Workshop Series

2020-21

For DUSON faculty, PhD students & Post-docs that conduct research

TOPIC	SPEAKER(S)	DATE
<p>MyResearchHome: A Best-Kept Secret for Finding Funding and More</p> <p>The MRH portal, funded by Duke's CTSA, puts relevant information specific to you and your projects at your fingertips. Your portal's content is personalized based on your researcher profile, showing you content you want and need to see, saving you time and effort. This holds true for finding funding opportunities relevant to your research. Hear from Duke's MRH product manager and the DUSON Faculty Science Core on how to make the most of MRH capabilities.</p>	Christin Daniels; Derek Jones	10/15/2020 12-1pm
<p>Grant Budgets: A Tale of Ruth's Chris and McDonalds</p> <p>Our Associate Dean for Research has been known to say, "You can't do Ruth's Chris research on a McDonald's budget." No matter your career stage, budgets are always difficult. Researchers are faced with right scoping their aims to fit within budget limits, while also proving the significance and innovation of their work. Hear from our faculty and staff budget experts on how to find that happy medium.</p>	Paula Tanabe; Jane Halpin; Tolu Oyesanya	10/29/2020 12-1pm
<p>Translating Nursing Research and Practice for the Public Sphere: Emerging from the Shadows</p> <p>The World Health Organization has designated 2020 the Year of the Nurse and Midwife. How can we encourage nurse scientists, teachers and clinicians to play a leadership role in academic and public settings by telling their stories and addressing patient and population needs? What can lessons learned about the public information environment offer us? What roles can health care professionals play in addressing medical misinformation? Dr. Brian Southwell, a social scientist at RTI International, faculty member at Duke University and UNC-Chapel Hill, and public radio host, will join us for an exploration of these questions.</p>	Brian Southwell 	11/12/2020 12-1pm
<p>Hiding in Plain Sight: All about Grant Supplements</p> <p>More funding, bigger impact. Hear from our faculty and staff about how to leverage your NIH Parent Grant for additional funding in the form of an administrative or diversity supplement.</p>	Rosa Gonzalez-Guarda; Sophia Smith; Christin Daniels, Robbin Thomas; Dori Steinberg	2/11/2021 12-1pm
<p>Thanks, NIH: New Forms F and RPPR Submission using ERA Commons</p> <p>At any point during your grant, NIH can institute a new policy that affects you. Hear from our Pre & Post Award teams about the latest updates to required Forms F and submission using ERA Commons.</p>	Robbin Thomas; Jane Halpin; Julie Yamagiwa; Mindy Kempson	2/17/2021 12-1pm
<p>Data Procurement, Management, Security and Storage within a Culture of Scientific Integrity</p> <p>What is PACE and who is the Honest Broker? These are questions that we should all know the answers as computational and data needs continue to grow for health researchers at Duke. Hear from our staff and faculty about the various systems, tools and resources available to properly protect your research data.</p>	Ryan Shaw; Glenn Setliff; Sue Hunter; Michael Cary; James Fayson; Christin Daniels	3/11/2021 12-1pm
<p>I Got the Grant, Now How Do I Manage My Project Team?</p> <p>From writing groups to NIH podcasts, there are many resources available for learning how to win a grant. However, once we have the grant, we have to run a project team. Hear from PI's, our ROCC Core and HR team about best practices for managing a research team.</p>	Paula Tanabe; Sue Hunter; Angie Keith, Terri DeMartino	3/25/2021 12-1pm
<p>CNR Statistics Core: How We Can Help Strengthen Your Research</p> <p>Follow the evidence! Evidence-based decision-making has become a common practice in health care, and evidence has to be revealed through data analysis. Hear from the Core about how they help DUSON's research community identify and develop appropriate analysis techniques, as well as how the use of advanced statistical methods can propel your research forward.</p>	John Myers	4/8/2021 12-1pm
<p>Biomarkers provide a measure of objectivity in your research outcomes.</p> <p>DUSON's biomarker capabilities provide DUSON researchers with a competitive edge compared to other Schools of Nursing. Hear from the Director of the Biomarker Lab and faculty whose research involves biomarkers, about how to incorporate biomarkers into your research, including alternative methods to consider while operating in a COVID-19 environment.</p>	Julia Walker; Akhil Hegde; Cyrus Lacuesta; Mitch Knisely	4/29/2021 12-1pm
